November 8, 2021

With your lab partner, draw two different UML diagram for one of the possible scenarios. Chose between activity, class, and use case diagrams. You can help each other. Each diagrams must belong to the same scenario.

1. Costumer continues to watch their series from online network.
2. Doctor office appointment for regular check-in.
3. Car rental appointment for regular customer.
4. Market automatic check out (self check out) for a customer wants to buy a water bottle.

Then you need the share these two drawings (as a pdf, or image file) into a **shared repository** from your GitHub account. As your worksheet, all of you need to upload both drawings and a screenshot of this share. (Repository with your files, etc) . **Do not forget to write your names and ID' s.**
